

A LITTLE DOG. A NEW CHAPTER.

Thor

A home to call
his own.

Cavapoo • Neutered male
About 17 months old

Historical puppy portrait

The right fit • \$50 rehoming fee

Thor needs a home without children. During a food-related incident on September 26, 2026, he bit a child's hand while trying to get the child's pork chop. His owner reports that the skin was not broken. There had also been concerning behavior earlier that week. His fit with adults and other pets needs individual assessment. We are looking for an experienced, thoughtful caregiver who can work with a veterinarian or behavior professional. Any applicable observation guidance and a safe transition plan will be addressed before handoff.

Care and records

Latest documented weight: 17.4 lb on August 17, 2026. Neutered September 24, 2025. Rabies, DA2PP and Bordetella recorded June 10, 2026; Leptospirosis recorded August 17, 2026. Grooming completed September 21, 2026. Veterinary records are organized for a screened receiving home or professional. Current medications, routines, test results and any record gaps must be reconciled before handoff.

His favorite things can come, too

Blankets, toys, stuffed animals, beds, pet car seats, dog carriers, treats/snacks and grooming shampoos can accompany him, along with two handmade wooden, dresser-style bedroom crates with electrical features. Exact counts, crate dimensions, condition and transport arrangements still need confirming.

Interested in helping?

Reply to the person who shared this profile with your household details, dog experience and ability to work with veterinary/behavior professionals. Screening comes before any placement decision.
